AVerDiGi Wireless Networking

Whatever you do....

Count on Wireless Surveillance Solution over AVerMedia

Cable is the basic building block for most local area networks (LANs). Cabling challenges arise for households and small businesses as many wiring closets are poorly structured and cables have become disorganized. Wireless networking has thus burst forth onto the scene as a killer application like no others in recent years. The hardwired network of yesterday has evolved into dynamic, mobile wireless technology.

AVerDiGi steps in to provide the one stop innovative solution. Meet AVerDiGi's **EB1704 HYBRID supporting wireless IP cameras**. Built on AVerDiGi's reputation for quality, EB1704 HYBRID is designed with using an additional wireless router. Users can have easy network integration and data transfer from PC/Notebook using wireless network without cabling. Supported wireless IP camera brands include Axis and many more.
